

Astronomy Review

ACROSS

- 2 a celestial object made of ice and dust
- 8 massive explosions on the Sun's surface
- 9 group of stars showing a recognizable pattern
- 13 this is an example of a natural satellite
- 14 a light year is a measure of _____
- 15 polaris appears to rise in the eastern sky and set in the _____ sky
- 16 a meteoroid that enters the Earth's atmosphere and burns up
- 17 the Earth rotates _____ when looking down on it from above the North Pole
- 18 the spinning of the Earth on it's axis
- 19 largest curved stream of particles that form a loop
- 21 one complete orbit of the Earth around the Sun
- 22 the four furthest planets are an example of this

DOWN

- 1 the Sun is mainly made of this gas
- 3 summer months the Earth is tilted _____ the Sun
- 4 winter months the Earth _____ from the Sun
- 5 the Earth's axis if extended would pass this star
- 6 the study of the universe
- 7 a small rocky body that orbits the Sun
- 8 occurs when the moon blocks the sun
- 10 how the sun produces energy
- 11 the _____ is a star in the centre of the solar system
- 12 the four closest planets are an example of this
- 20 the asteroid _____ is located between Mars and Jupiter
